

*CF Thermal, Inc.*

## Alloy Recycling Program

CF Thermal, Inc. offers its customers an Alloy Recycling Program. The program is designed to ensure that our customers are getting a fair price for their Scrap Alloy to use towards new/replacement Products and/or Credit. We offer both a credit towards new products as well as Cash for all Nickel based Products. CFT can even arrange the transportation of your scrap to our location.

CF Thermal, Inc. has been offering our customers this service successfully for over 5 years and has found it to be a great asset for their Alloy budgets each year. Selling your scrap to a local company for pennies on the dollar and the funds going into the plant's general funds, does not benefit your department nor your budget. Let us help you with your Budget goals by using this program.

Call CF Thermal, Inc. for our current pricing and start your Recycling program, today.

- Payment: Check or Credit
- Transportation Available
- Full Break-Down Report on all items sold.
- Prompt Service and Payment
